Individual Project 4 DS160-01 Introduction to Data Science Spring 2022

Writing SQL Queries(50 points)

Goal: The goal of this project is to provide you practice for writing simple SQL queries.

Instructions: Create a new .sql file titled **IP4_XXX.sql**, where **XXX** are your initials; and rename this file to **IP4_XXX.docx**. Also create a GitHub repository titled **IP4_XXX** to which you can push both your .sql file and this document.

Attached to the assignment are two .sql files. HenryBooksCreate.sql which will create the database on you MySQL server and HenryBooksFill.sql which will fill it with data.

You will form the following queries for the Henry Books database and provide the statement and the output in this document. All of your SQL statements should also be in the .sql file. Use a comment (# mark) in your .sql file to number the statements according to this document. Each problem is marked with its point worth.

1. Retrieve the first name and last name of each author in the author relation. Order does not matter. (1 points)

SQL Statement:

SELECT firstName as "First Name", lastName as "Last Name" FROM author:

Output:

| First Name | Last Name |
|------------|--------------|
| Toni | Morrison |
| Paul | Solotaroff |
| Vernor | Vintage |
